

THE TRIBUNE.

TUESDAY MORNING, OCTOBER 11.

WHIG STATE NOMINATIONS.

FOR PRESIDENT,
HENRY CLAY,
OF KENTUCKY.
FOR GOVERNOR,
LUTHER BRADISH,
OF FRANKLIN CO.
FOR LIEUT. GOVERNOR,
GABRIEL FURMAN,
OF KINGS.

FOR SENATORS.

IV. JOHN BROTHINGHAM, Fulton Co.
VI. CHESTER BUCK, Lewis Co.
VII. THOMAS A. JOHNSON, Steuben Co.
VIII. HARVEY FURNACE, Wyoming Co.

Election Tuesday, Nov. 8—(one day only.)

Central Clay Committee.—A regular meeting of this committee will be held at National Hall, on Wednesday evening, the 12th inst., at 7 o'clock, for the purpose of completing the election of officers.
CONRAD SWEET, Chairman pro tem.
JAMES E. BEARS, Secretary pro tem.

The Office of The Tribune is removed to the new and spacious buildings, No. 160 NASSAU STREET, in front of the Park, and nearly opposite the City Hall.

The Whig Almanac and United States Register may be obtained in all the principal Cities from the agents of the Tribune and from the Booksellers. Price \$1 per dozen, \$7 per hundred, or for single copies 124 cents.

NEW-JERSEY opens her Election to-day. We believe her Whigs are READY—that there is no sluggishness among them—and that it is impossible that they should throw away their State by insane feuds, as we have just seen done in Maryland. And yet we hear that there is danger of losing the Councilman in Passaic and the Sheriff in Middlesex by just such divisions! Jerseyment! by the memories of Trenton and Monmouth, we implore you to do your whole duty! Let there be no equivocal result—no discordant note—but a fair, straight victory. Such a victory, union and energy will secure to you. Now is the hour to achieve it! Push on your column!

There is a sharp contest in Philadelphia to-day for the city offices. Our correspondent (for whose letter we have not room) thinks that Locofocoism, Tylerism, the outcry against the Girard College, City Expenditures, Taxes, &c., and the profuse promises of places and jobs by the Locos, all together, would triumph but for the name of HENRY CLAY. That, he is confident, will carry us through safely, though with a majority far below the Whig strength.

The Croton Water Celebration.

We do not think it necessary to make 'much ado' about our City Celebration of the introduction of the Croton Water, which takes place on Friday. Already every body knows that it will take place, and when; and every body will share in it, either as spectator or spectator. The Procession will doubtless exceed any thing we have had in that line since the Funeral Honors to President Harrison. Already we see that nearly all the Trades and Societies are preparing to turn out with their appropriate emblems. The Military will of course be out in their blazonry. It will be a great day for New-York, as befits the completion of so noble and beneficent an undertaking.

What with the Fair of the American Institute, the Home Industry National Convention, and the Croton Celebration, we shall have a lively week of this.

The Rochester Evening Post makes some unfair comments on a paragraph respecting Rhode Island matters copied from this paper. As the Post professes neutrality, its injustice is more noticeable than that of the Argus, Plebeian & Co. As the Post has used the name of The Tribune in regard to this matter, we will now ask its Editor to answer the questions we recently put to the Argus bearing on the Rhode Island question; and, as it may not have them at hand, we will repeat them substantially, viz:

By the Constitution of New-York, a negro owning \$250 worth of unincumbered Real Estate is entitled to vote, while all other negroes—and there are 30,000 of them—are disfranchised. Now:

1. Can these 30,000 disfranchised negroes in any way help themselves to the Right of Suffrage? and how?

2. Assuming that there are 440,000 legal voters in the State, can 210,000 of them, combining with the 30,000 blacks, in any way extend the Right of Suffrage to the latter? and how?

3. Should the aliens settled in this State claim the right of Suffrage, how is it to be determined that they shall or shall not be admitted to exercise it?

—Should the Editor of the Post choose to deem these questions irrelevant we trust that they will prevent his answering them.

Col. R. M. JOHNSON, ex-Vice President, came into Philadelphia from Reading by railroad yesterday, and had his pocket-book, containing over \$100, stolen just as he left the cars. The thief had not been detected when the train left for this city.

The Herald is again under full headway—bragging, with all the power of its 'four steam presses,' its uncounted compositors and its 'unvalued corps' of braggadoos, of the expedition with which it will publish Webster's next speech, if he ever makes one. We wonder if they have not already got a sketch of it!

The Whig County Convention convened last evening at the Broadway House, and after organizing, adjourned until Tuesday evening next.

DEATH OF DR. CHANNING.—Our readers will see by an advertisement in another column that Rev. H. W. BELLows of this city is to deliver a Discourse on Thursday evening upon the Life, Character and Death of the late lamented WILLIAM ELLERY CHANNING. We know of no man among us better fitted to discharge this office of affectionate regard and esteem than Mr. Bellows. We only fear that the Church of the Messiah will not contain a third of those who will wish to listen to his discourse.

THE UNITED STATES ALMANAC, or Complete Ephemeris for 1843, edited by John Downes, late of the North-Eastern Boundary Survey, has just been published by Dayton & Newman, 199 Broadway. It forms a large double-column 12mo. of 324 pages. Its most important feature is an alphabetical table of the late Census of every State, County and Town in the Union—a table much needed for reference, but hardly attainable hitherto. It has beside a very large amount of Statistical and Astronomical matter.

It is said that the body of Capt. W. W. Peters, of Troy, whose sudden disappearance we noticed a day or two since, has been found in the Mohawk at Cohoes. It is supposed that he was murdered, as he is known to have considerable money with him.

THIS MORNING'S MAIL.

Things in Philadelphia.

Correspondence of the Tribune.

PHILADELPHIA, Oct. 10.

There were but 33 deaths in our city last week.

Nicholson, convicted of forgery and embezzling the property, was sentenced this morning to three years solitary confinement in the Eastern Penitentiary. I saw him on his way out to his gloomy abode—a gentle, intelligent and honest looking young man, but a most melancholy instance of abused talents.

Sales at our Stock Board to-day—\$1300 City Five's, 1864, at \$2, \$3,000 Kentucky Bonds, Sixes, at 76; 20 shares City Bank, at 42; \$1000 Pennsylvania Five's, 1858, at 49; \$970 do. Sixes, 1843, at 53.

The Maryland Election Decided.

Correspondence of The Tribune.

BALTIMORE, Oct. 9, 1842—6 o'clock P. M.

The steamboat from the Eastern Shore did not arrive last evening till late in the night, being detained on the other side of the bay by a fog. I could not therefore send you the result of our election, as I expected to have done; but you will get it soon enough, seeing what it is.

When I last wrote you, Somerset, Dorchester and Worcester, on the Eastern Shore, and St. Mary's on the Western Shore, were to be heard from. Somerset has vindicated her name, and elected two Loco-Focos to the House of Delegates, giving us only the State Senator and the other two Delegates. Worcester sent some twenty Whig candidates and two or three Loco-Focos, and one of the latter stepped in. Dorchester, as she always does, came out right side up. St. Mary's did not elect a Loco-Foco, (a thing which she has never done,) but she came so near it that we only elected two of our candidates, the other being tied by a Loco-Foco. These results give the Whigs the State Senate by five majority, and the Loco-Focos the House by some ten majority, and of course secure to the latter the election of the U. S. Senator. The detailed result is as follows:

SENATE.

Whigs, L. F.

Old members—9 5 Caroline.....1 1 Montgomery.....1 1 Somerset.....1 1 Anne Arundel.....1 1 Calvert.....1 1 Charles.....1 1

HOUSE OF DELEGATES.

Whigs, L. F.

Allegany.....2 2 Montgomery.....2 2 Prince Georges.....2 2 Queen Anne's.....2 2 St. Mary's.....2 2

Carroll.....1 1 Talbot.....1 1 Calvert.....1 1 Washington.....1 1

Charles.....1 1 Worcester.....1 1

One Independent.

One tie between Whig and Loco-Foco.

Giving the Loco-Focos a majority on the joint ballot of 5, without counting the independent member from Carroll, or the new member from St. Mary's, who will, most likely, in a new election, be a Whig.

PASSING COUNTERFEIT BILLS.

A well dressed young man named William Boggs, who said he came from Philadelphia, went on Sunday evening to the clothing store of James McKinley, No. 52 Bowery, and purchasing a coat, gave a \$10 bill, purporting to be of the Seventh Ward Bank of this city, in payment. Mr. McKinley, as it was Sunday, locked Boggs in his store, and took the bill across the street to get it changed, when it was ascertained to have been altered from a \$10 bill of the broken Tenth Ward Bank, retaining the names of the officers of the latter Bank. On this information, McKinley applied to officers Tompkins and Welch, who arrested Boggs, and on his person found ten of the altered \$10 bills, and Boggs was committed to prison. Persons who have received any of these bills are requested to bring them to the Police Office.

The Police of Quebec recently 'struck' for their pay.

On the 1st inst. the Mercury says not a single man was on duty. Two months' wages were in arrears.

SAND'S SARAPARILLA.—KING'S EVIL.

—An imaginary cure said to be performed by the royal touch. This disease makes its appearance on different parts of the body, and is attended with great suffering. It is a complaint, from whence it proceeds to seize upon and utterly destroy the cartilages, ligaments and bones. The first symptoms are enlargement of the glands, and the glands are enlarged in the neck, in the arms, in the hands, and in the feet. The disease is attended with great suffering, and is often fatal. It is a complaint, from whence it proceeds to seize upon and utterly destroy the cartilages, ligaments and bones. The first symptoms are enlargement of the glands, and the glands are enlarged in the neck, in the arms, in the hands, and in the feet. The disease is attended with great suffering, and is often fatal. It is a complaint, from whence it proceeds to seize upon and utterly destroy the cartilages, ligaments and bones.
